

Race Studio 3

Download settings

Question:

How can I set RS3 Data Download?

Answer:

To set Data Download on RS3

- run the software
- clic "Preferences" icon on the left keyboard
- select "Data Download" option

Race Studio 3

The panel below appears; it is made up of four layers:

Download Data:

- default storing folder is: C/AIM_SPORT/RaceStudio3/user/data/; to store your data elsewhere press "Change..." and select destination folder
- the two sub-layers "Folder Structure" and "File name" works in the same way and allows user to decide folders structure and which information to include in the file name: changing the selected fields the example on top of the list updates in real time
- you can also decide to copy downloaded data in another folder enabling "Copy downloaded data to another folder" checkbox bottom of the list: default storing folder and "Change" button appear.

🜁 Data Download Preferences						
Download Data Download Movies Download Venue Types Advanced						
Root folder for download C:/AIM_SPORT/RaceStudio3/user/data/						
Folder Structure File Name						
Enable and move fields to create proper folder structure						
Example: Date/Racer/Vehicle

Track		• •				
Venue Type		• •				
Custom Text 1		• •				
Custom Text 2		•				
Copy downloaded data to another folder						
	ОК	Cancel				

Download Movies:

- Movies download is by default set as data download image below on the left;
- to customize the download disable the checkbox and setting options appears; it works exactly like data download layer: you can decide where to store your movies, how to organize the folders, how to name the files and if copying them in another folder or not.
